

HYDAC INTERNATIONAL

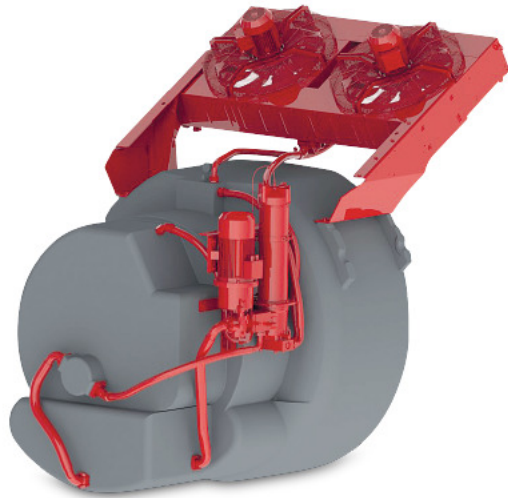

Cooling Area / 冷卻領域

大型齒輪箱冷卻系統：
100KW up to several MW

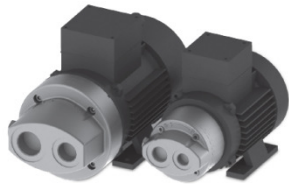

Gearbox Cooling Systems

主迴路、offline、風冷冷卻（板式熱交換器亦可）、油污溫度及壓力指示sensor可安裝、過濾器、油污染度監控亦可安裝。

Feed Pumps
FZP/MFZP

HYDAC gearbox lubrication coolers are compact systems for application-specific oil conditioning:

Feed pump + LPF filter for lubrication of gear box.
齒輪箱潤滑過濾模式：進給泵Feed pump + 低壓過濾器LPF

HYDAC INTERNATIONAL

Cooling Area / 冷卻領域

Mounting position of a diesel filling pump

Filling pumps

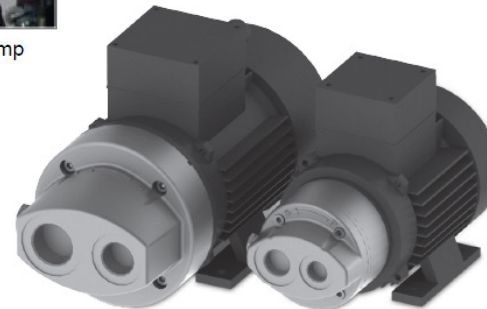

- For hydraulic oil or diesel fuel

適用：
液壓泵、柴油泵
採用DC直流馬達

ADVANTAGES

- Suction head up to 2.5 m height
no initial filling necessary before commissioning
- Compact construction
space-saving and reduction of weight
- DC motor with safety type IP65
industrial application possible
- DC motor with low output due to good pump efficiency
Less power consumption
- Suitable for intermittent dry operation

Feed Pumps FZP / MFZP

Feed pump + LPF filter for lubrication of gear box.

齒輪箱潤滑過濾模式：進給泵Feed pump + 低壓過濾LPF
